Viral vector production for cell and gene therapy

Process development and manufacturing solutions
With recent market launches of novel cell and gene therapies, focus is shifting to securing critical production components and improving patient access. Leveraging our pedigree in the monoclonal antibody and vaccine space, we bring you flexible, end-to-end solutions for plasmid, lentivirus, and adeno-associated virus (AAV) production. Our offerings go beyond reagents and equipment, to include GMP-ready suites, facilities, and enabling services.
Suites, facilities, and services across the globe
Innovative, flexible solutions that support manufacturing productivity

FlexFactory™ manufacturing suite
Flexible, single-use processing line

KUBio™ manufacturing facility
Off-the-shelf, modular facility that expands as your needs change – BSL-1 or BSL-2

Fast Trak™ services across upstream and downstream
- Process development
- Biomanufacturing
- Custom services, including spent media analysis
- Comprehensive training around the world – at our site or yours
